HaltLock is proud to be accredited with ISO 9001 certification, the international standard that outlines the requirements for a robust quality management system (QMS). This prestigious accreditation signifies our commitment to consistently delivering high-quality products and services that meet both customer expectations and regulatory requirements.

By adhering to ISO 9001 standards, we ensure that our processes are efficient, effective, and continually improving. This commitment not only enhances customer satisfaction but also reinforces our dedication to excellence in vehicle security solutions. With HaltLock, you can trust that you're choosing a product backed by rigorous quality standards and a strong focus on reliability and performance.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

HALTLOCK

HaltLock™, a Military grade robust tamperproof anti-theft device manufactured from high-quality metals, stainless steel, and combined with state of the art IoT functionalities, offering a revolutionizing solution to vehicle theft.

HALTLOCK GEN 4 – UNBEATABLE VEHICLE SECURITY

HaltLock has always been a leader in vehicle security by preventing the propshaft from turning. Now, with the revolutionary Gen 4, we've taken it a step further.

The new Gen 4 HaltLock is installed on the side of the gearbox, where it locks the transmission. When engaged, it completely prevents the vehicle from being shifted out of Park. No matter what criminals try, your vehicle will remain immobilized until you unlock HaltLock, allowing the gear lever to function again.

Even if criminals gain access to your vehicle and start the engine, they won't be able to drive away. Since the wheels cannot turn, the vehicle is completely immobilized. Attempts to forcefully break the gear lever or cables will be futile – the vehicle will remain locked in place.

Unbreakable Protection

All electronics and locking mechanisms are securely housed inside a reinforced steel enclosure mounted on the transmission. The 3CR12 steel casing is resistant to cutting torches, ensuring that even the most determined criminals cannot break in or disable the system. Even if criminals possess a HaltLock device themselves or have complete knowledge of how it works, they will not be able to bypass it.

Fail-Proof Security with Autolock

With the autolock functionality, HaltLock eliminates human error by automatically securing your vehicle, ensuring it's always protected.

100% Theft Prevention

HaltLock has a proven 100% success rate—once activated, your vehicle simply cannot be moved.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

KEEPING IT STATIONARY IS THE KEY FUNCTION!

HALTLOCK MOBILE APP

The HaltLock app delivers advanced IoT functionality for a seamless and secure vehicle management experience. It allows you to monitor your vehicle's battery status in real time, remotely lock and unlock your HaltLock device (except in emergencies, where only force lock is enabled through the HaltLock operations team), and receive instant security notifications. The app also includes an emergency button for quick assistance, tamper alerts to detect unauthorized interference, and real-time vehicle tracking for total peace of mind. Plus, the built-in logbook makes it easy to track your vehicle's usage.

With HaltLock, you stay connected and in control—anytime, anywhere.
